

Oil and grease in the sewage system

A growing problem
that both costs money
and harms the environment
We need your help!

WE URGE YOU - starting today – as much as possible – to avoid flushing oil and grease into the drain.

TIPS

Oil, dressing, marinades that contain butter or cooking oil can be removed with paper towels so that they are not flushed down the drain.

Larger amounts of oil and grease – such as frying oil – can be poured into 1-liter bottles and dropped off at the environmental station.
